

## Special Issue

# Advances in Electric and Magnetic Fields Induced Drug Delivery

### Message from the Guest Editors

In recent years, the use of external electric and magnetic fields to enhance drug delivery has grown dramatically. Electric fields are being used to cross physical barriers such as vessels or cell membranes either by permeabilization (for example electroporation), electroendocytosis, iontophoresis, or by affecting the para-cellular pathway. Additionally, drug delivery systems such as electroresponsive systems facilitate the delivery of charged or magnetic nanoparticles and conductive polymer-based systems (hydrogel film or nanoparticles). Those systems enable a controlled and localized release of drugs to the desired tissue, limiting systemic side effects. Magnetic fields are being used in combination with magnetic nanoparticles to trigger drug release or to increase drug accumulation in a specific target. The aim of this Special Issue is to highlight electric and magnetic field-based drug delivery mechanisms. Authors are invited to submit their original research or review articles within this subject area. Preclinical (in vitro and in vivo) and clinical research as well as theoretical and technical papers are invited.

## About the Journal

### Message from the Editor-in-Chief

*Pharmaceutics* (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Patrick J. Sinko

Ernest Mario School of Pharmacy, Rutgers, The State University of New Jersey, William Levine Hall, Room 225C, 160 Frelinghuysen Road, Piscataway, NJ 08854-8020, USA

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.7 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2025).
