Advancements in Industrial Pharmaceutics: Innovations and Future Directions

Message from the Guest Editors

Coating is necessary for most pharmaceutical solid dosage forms, e.g., tablets, pellets, capsules and particles. Its functionalities include enhancing drugs' physical and chemical properties, achieving taste masking and spatiotemporally modifying drug release behaviors. Currently, liquid spray coating (organic solvent and aqueous systems) is practically utilized in the industry to obtain the coating film with acceptable uniformity. However, the presence of liquid (organic solvent and water) may cause several problems, such as solvent residue and VOC emissions. Additionally, the liquid coating process is not suitable for vulnerable actives and newly developed drug delivery systems such as micro/nanoparticles and implants. In order to fulfill the demand of these actives and delivery systems, many studies have been performed both in designing new dry coating strategies and developing novel coating materials, e.g., cell membranes with expanded functionalities. Therefore, the main aim of this Special Issue is to present current research works focusing on coating techniques for pharmaceutics, particularly dry coating and coating strategies for micro-/nano drug delivery systems.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko
Department of Pharmaceutics, Ernest Mario School of Pharmacy,
Rutgers University, Piscataway, NJ 08854, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1
(Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
