

## Special Issue

# Functional Polymers in Drug Delivery

### Message from the Guest Editor

Significant progress in pharmaceutical technology over last decades would be unimaginable without the wide application of polymers with special properties and functions. The polymers differ in origin (natural, semi, or synthetic) as well as in functionality; dissolution retardation or solubility improvement; and insurance of preparation processes or imparting required physical properties to the dosage form (e.g. rheological). This points to an improvement in the stability of active ingredients or biopharmaceutical characteristics (e.g., enteric or gastro-retentive dosage form). The variety of polymers ranges from water-soluble/swellable pH which is independent to water insolubility. A special group of polymers, biodegradable polymers, are increasingly used for parenteral dosage forms to prolong the drug release over weeks or months. Besides numerous advantages, there are still challenges associated, sometimes, with high costs, not sufficient standardization, or negative impact on the body (e.g., acidic environment on injection site). In this insight, research papers investigating various aspects of polymer application in drug delivery would be appreciated.

## About the Journal

### Message from the Editor-in-Chief

*Pharmaceutics* (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Patrick J. Sinko  
Department of Pharmaceutics, Ernest Mario School of Pharmacy,  
Rutgers University, Piscataway, NJ 08854, USA

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
