Trends in mRNA Vaccine Development and Applications

Message from the Guest Editor

Since the roll-out of mRNA-lipid nanoparticle (LNP)-based COVID-19 vaccines in 2020, billions of people have been immunized with this type of vaccine, representing a novel technology platform to fight infectious diseases. Pfizer-BioNTech's Comirnaty and Moderna's Spikevax, the lead mRNA-LNP formulations, trigger immune responses that effectively reduce the pathogenicity of SARS-CoV-2, saving millions from severe illness or death. The mechanism of this benefit, details of these vaccines' structure and function, as well as their side effects have been the subjects of unprecedented scientific and public attention, yet novelties in these fields emerge each day. Many believe that technology will surpass all other approaches of gene and pharmacotherapy, but there is also a lot of scientific and public discussion of presently ill-understood adverse effects, of which clarification is necessary to secure safe beside efficacy. The goal of this Special Issue of *Pharmaceutics* is to provide a 2024 update on the most recent developments and prospects in this field. Original research data and comprehensive reviews are all welcome to be submitted to this Special Issue.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko
Department of Pharmaceutics, Ernest Mario School of Pharmacy,
Rutgers University, Piscataway, NJ 08854, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1
(Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
