# Extracellular Vesicle for Drug Delivery

### Message from the Guest Editor

Extracellular vesicles (EVs) are gaining attention as natural drug delivery systems due to their biocompatibility, targeted delivery capabilities, and minimal immunogenicity. Recent advancements in EV-based drug delivery highlight their potential for improving therapeutic outcomes in various diseases. This Special Issue focuses on the development and application of EVs for drug delivery, with an emphasis on innovative quantification techniques essential for standardizing their use in clinical and research settings. We welcome submissions on novel methods for EV quantification, quality control, and their role in optimizing EV-based drug delivery systems. You are invited to contribute to advancing this promising field of research.

## About the Journal

### Message from the Editor-in-Chief

*Pharmaceutics* (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1  
(Pharmaceutical Science)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
