

## Special Issue

# Advancements in Novel Nanomaterials for Cancer Therapy and Diagnosis

### Message from the Guest Editors

Nanotechnology is a relatively new field with the potential to create new technology for more accurate and efficient cancer treatment and diagnosis.

Nanotechnology deals with developing nanomaterials with a high surface area-to-volume ratio and possessing unique optical, magnetic, and electrical properties.

Nanotechnology utilizes a wide array of materials ranging from biological to synthetic origins, to fabricate tiny particles, which have excellent abilities in terms of physicochemical properties and is widely being studied to illustrate their biological interactions. Multiple approaches have been studied, including size-based efficiency and surface property-mediated proficiency and so on, examined to control the progression of cancer effectively. Nanotechnology-derived immunotherapy depicts an exceptional ability in suppressing cancer development; however, there is a long way to go to attain side-effect-free effective nanotoxic materials for the treatment of diverse cancer diseases. The goal of this Special Issue is to document developments in nanomaterials for cancer therapy and diagnosis.

## About the Journal

### Message from the Editor-in-Chief

*Pharmaceutics* (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Patrick J. Sinko

Ernest Mario School of Pharmacy, Rutgers, The State University of New Jersey, William Levine Hall, Room 225C, 160 Frelinghuysen Road, Piscataway, NJ 08854-8020, USA

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.7 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2025).
