

Special Issue

Novel Therapeutic Agents and Innovative Delivery Systems Against Infectious Diseases

Message from the Guest Editor

Innovative therapeutics against infectious diseases are urgently needed. The lack of a strong pipeline of anti-infective drugs, coupled with the rising prevalence of resistant and emerging pathogens, has led to a health crisis, posing a serious threat to global health systems. Novel approaches to drug development are required. This Special Issue explores advancements in discovering new therapeutic agents and drug delivery systems against infectious diseases, particularly those targeting emerging and resistant pathogens. We aim to highlight breakthroughs in small molecules, biologics, vaccines, and advanced drug delivery systems, such as nanocarriers, lipid-based formulations, and targeted delivery strategies. We welcome the submission of original research articles and reviews that advance our understanding and treatment of infectious diseases through novel therapies and innovative delivery strategies. The aim is to bring together diverse perspectives from pharmaceutical sciences, including drug discovery, formulation chemistry, pharmacokinetics, and preclinical/clinical development, focusing on translational research to meet unmet needs in treating infectious diseases.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko
Department of Pharmaceutics, Ernest Mario School of Pharmacy,
Rutgers University, Piscataway, NJ 08854, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1
(Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
