

## Special Issue

# Functional Biomaterials for Biomedical Applications

### Message from the Guest Editor

Biomaterials with specific immuno- and inflammation modulatory attributes in synergy with therapeutics, biologics, and tissue systems are extremely useful within clinical translation. Current biomaterials are mainly developed as drug carriers or inert scaffolds in tissue culture systems without any intrinsic functional attributes. This Special Issue aims to introduce high-impact research articles focused on the development of functional biomaterials for specific disease therapy, drug delivery, and innate immune and inflammation modulatory systems. This Special Issue will compile high-impact research articles that guide the development of next-generation functional biomaterials.

## About the Journal

### Message from the Editor-in-Chief

*Pharmaceutics* (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1  
(Pharmaceutical Science)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
