Recent Advances Using Enhancement Strategies and Technologies for Topical Drug Delivery

Message from the Guest Editors

Pharmaceutical technology has been devoted to developing strategies and technologies to enhance the amount of drug permeating through external tissues such as the skin, eyes, nails, vaginal and buccal cavity. As accessible tissues, these body parts have inherent protective physiological functions and are natural barriers for drug penetration. For a long time, technological approaches have focused on using formulations, designs and excipients for circumventing such protective functions. Significant progress has been made over the years, specifically applying drug delivery nano systems that can have multiple mechanisms for enhancing drug delivery.

This Special Issue aims to reunite recent research studies that represent advancements achieved with the use of enhancement strategies and technologies for drug delivery or for the development of the technology itself. We invite articles on all aspects of improved topical drug delivery, with an emphasis on formulation strategy, performance analysis or on the use of physical enhancement technologies and its applications.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko
Department of Pharmaceutics, Ernest Mario School of Pharmacy,
Rutgers University, Piscataway, NJ 08854, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1
(Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
