Effective Therapies for Diabetes

Message from the Guest Editors

Treatment of diabetes, particularly type 2 diabetes, is a growing field. In the last decade, we have gone on an interesting path, from glucocentricity to ever-evolving targeted diabetes therapies aimed at the reduction of chronic complications per se, above all, reducing morbidity and mortality from cardiovascular disorders. In recent years, the protection of target organs, particularly cardiovascular and kidney protection, with antidiabetic drugs have been found to be very important regardless of glycemic control. However, as the field evolves, new questions are emerging, and therefore answers are needed. To answer questions from our daily clinical practice and open new ones, we have created this Special Issue.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko
Department of Pharmaceutics, Ernest Mario School of Pharmacy,
Rutgers University, Piscataway, NJ 08854, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
