# Advances in the Interaction of Nanomaterials and Biosystems (Enzymes, Proteins, Peptides)

### Message from the Guest Editors

Due to their peculiar properties, nanomaterials are nowadays widely employed in biomedical applications. In this field, the mode of action of nanomaterials relies on their interaction with proteins, enzymes, peptides, nucleic acids and lipids, which are ubiquitous in physiological environments. In order to tune, engineer, develop and create novel platforms, it is crucial to understand and decipher how the dyad “nanomaterial–biosystem” interacts. This knowledge is fundamental to develop novel nano-medical, –diagnostic and –therapeutic systems. We invite researchers working on nanomaterials in the biomedical field, with a particular interest in deciphering the interaction between biosystems and nanomaterials, to contribute to this issue.

## About the Journal

### Message from the Editor-in-Chief

*Pharmaceutics* (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.7 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2025).
