Peptides and Peptide Mimetics: Potential Tools for Therapy

Message from the Guest Editor

Biomedical research is constantly oriented toward the development of new therapeutics based on peptides. Peptides have been widely investigated across the therapeutic spectrum and successfully developed as drugs, vaccines, and cosmeceuticals, providing treatment for diabetes, endocrine disorders, cancer, Alzheimer's disease, cardiovascular disease, and many more. The increase in the generation of peptidomimetics, as well as the maturity of peptide synthesis technology, have managed to help to overcome the limitations of peptide drugs and highlight their attractive pharmacokinetics profile. Moreover, interest in larger peptidomimetics is growing, especially with a view to developing novel antimicrobial therapeutics and to identifying bioactive compounds addressing protein–protein interactions. Therefore, we invite investigators to contribute original research articles as well as review articles in the following potential topics:

- Biopharmaceutical issues for peptide administration;
- Chemical modification of the peptides;
- Antimicrobial peptides;
- Anticancer peptides;
- Neuropeptides;
- Peptides as targeting moieties;
- Molecular modeling.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko
Department of Pharmaceutics, Ernest Mario School of Pharmacy,
Rutgers University, Piscataway, NJ 08854, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1
(Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
