

Special Issue

Recent Advances in Nanodelivery Systems for Plant and Food Derivatives, 2nd Edition

Message from the Guest Editors

This Special Issue aims to collect contributions in the field of pharmaceutical nanotechnology applied to plant and food derivatives, also considering the possibility of using plant and food as a source of bioactive components of nanodelivery systems. Many constituents of plants and foods have numerous biological activities, but they do not possess drug-like characteristics, with consequently limited efficacy and clinical use. Recently, many food macromolecules have been reported for health-promoting effects, but they have low application in functional foods, food supplements, medical devices, or medicine because of their inefficient systemic delivery and poor oral bioavailability. However, they have attracted considerable attention as structural components of nanocarriers due to their biocompatibility, biodegradability, renewable origin, and easy modification. Therefore, nanotechnology encases the perspective of offering many strategies to improve the efficacy of natural derivatives from plants and foods and an application platform for their chemical, nutritional, and pharmaceutical potential.

Guest Editors

Prof. Dr. Anna Rita Bilia

Dr. Giulia Vanti

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko
Department of Pharmaceutics, Ernest Mario School of Pharmacy,
Rutgers University, Piscataway, NJ 08854, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1
(Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
