Biomaterials for Controlled Drug Delivery: Innovations and Applications

Message from the Guest Editors

Controlled drug delivery systems revolutionize medicine by enhancing precision and minimizing side effects. Biomaterials form the foundation of these systems, enabling drug encapsulation, stabilization, and targeted release. Advances in polymers, hydrogels, nanomaterials, and biocomposites address challenges like drug stability, controlled release, and site-specific targeting. Stimuli-responsive biomaterials, triggered by pH, temperature, or enzymes, further boost therapeutic adaptability. This Special Issue explores cutting-edge research and applications of biomaterials in controlled drug delivery, highlighting their transformative potential. The aim of this Special Issue, **“Biomaterials for Controlled Drug Delivery: Innovations and Applications,”** is to showcase advancements in polymer-based systems, ceramics, and composites for drug delivery. Topics include polymer hydrogels, nanogels, electrospun fibers, polymeric micelles, bioactive glass nanoparticles, mesoporous silica nanoparticles, calcium phosphate systems, and hybrid composites. Emphasis is placed on controlled release, targeted delivery, stimuli-responsive systems, and tissue regeneration.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko

Ernest Mario School of Pharmacy, Rutgers, The State University of New Jersey, William Levine Hall, Room 225C, 160 Frelinghuysen Road, Piscataway, NJ 08854-8020, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.7 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2025).
