## Immunotherapy of Melanoma

### Message from the Guest Editor

This Special Issue aims to collect manuscripts related to the identification of novel targets for the immunotherapy of melanoma and ways to remodel the immune composition of the tumor microenvironment to maximize treatment efficacy.

We are inviting the submission of high-quality research papers covering different aspects of this topic. These include (but are not limited to): identification of novel immune checkpoints and design of novel immunotherapeutics, identification of superior drug delivery mechanisms, obstacles and resistance mechanisms to successful immunotherapy and analysis of clinical treatment approaches.

We are looking forward to receiving your contributions.
