## Spray Drying in the Pharmaceutical and Nutraceutical Field

## Message from the Guest Editors

Spray drying is one of the most established means used in the pharmaceutical and food industries to convert liquids into powders. This continuous mechanical process allows for obtaining dry formulations characterized by enhanced shelf-life. Due to the short contact time of the feed liquid with the hot drying medium, spray drying is widely used for the microencapsulation of heat-sensitive and valuable bioactive molecules, in addition to volatile compounds. Another advantage of spray drying is the possibility of modulating the physicochemical and technological characteristics of the powders, and hence the final product quality, by opportunely setting the formulation and process parameters. We are pleased to invite you to contribute to this Special Issue. Your outstanding research will support scientists in tackling the challenges encountered in the obtainment of powders suitable for their formulation into pharmaceuticals and nutraceuticals. Both original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: pharmaceutical, nutraceutical and food sciences, biotechnology and the chemical industry.

## **About the Journal**

## Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

#### Editor-in-Chief

Prof. Dr. Patrick J. Sinko

Ernest Mario School of Pharmacy, Rutgers, The State University of New Jersey, William Levine Hall, Room 225C, 160 Frelinghuysen Road, Piscataway, NJ 08854-8020, USA

### **Author Benefits**

## **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

## **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
