# Advances in Amorphous Drug Formulations

#### Message from the Guest Editor

Amorphous drug delivery systems are one of the most promising technologies to tackle the issue of poor bioavailability of an increasing number of poorly soluble drugs in the development pipelines. Due to the poor physical stability of pure amorphous drugs, formulation scientists frequently use different types of excipients to stabilize the drug in its amorphous form, including different types of polymeric carriers, mesoporous materials or other low molecular weight excipients. The mechanism of stabilization has been attributed to the properties of the chosen excipient and the drug, such as drug-excipient miscibility, antiplasticization, molecular interactions, etc. However, whilst more and more products have reached the market in the past few years, the amorphous form and amorphous formulations still remain not fully understood. This Special Issue serves to capture the contemporary progress in the field of amorphous formulations, both from a fundamental understanding and their practical application.

## **About the Journal**

#### Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

#### Editor-in-Chief

Prof. Dr. Patrick J. Sinko

Ernest Mario School of Pharmacy, Rutgers, The State University of New Jersey, William Levine Hall, Room 225C, 160 Frelinghuysen Road, Piscataway, NJ 08854-8020, USA

#### **Author Benefits**

#### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

#### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
