

Special Issue

Antifibrotic Drugs

Message from the Guest Editor

Fibrosis is an exaggerated wound-healing response to chronic tissue damage. Fibrosis affects nearly all tissues and organ systems and ultimately results in organ failure. Diseases leading to fibrosis are an increasing clinical and economic burden. It is estimated that fibrosis contributes to almost 45% of deaths in the developed world, as this pathology is a feature of numerous conditions (e.g., persistent viral infections and autoimmune reactions) across multiple organs. Despite the progress made in the field of fibrosis research, the clinical success rate in antifibrotic drug development is very limited. Therefore, this Special Issue will discuss promising new targets to treat organ fibrosis and potential antifibrotic drugs. Furthermore, there will be an emphasis on targeted delivery and formulation of potential antifibrotic drugs. Animal models of fibrosis rarely predict the success of antifibrotic drugs in humans. Hence, this issue will deliberate novel models that better predict the efficacy of antifibrotic drug in humans.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko
Department of Pharmaceutics, Ernest Mario School of Pharmacy,
Rutgers University, Piscataway, NJ 08854, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1
(Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
