

## Special Issue

# Emerging Strategies to Improve the Design and Manufacturing of Biocompatible Therapeutic Materials

### Message from the Guest Editors

Currently, the field of medicine is drastically increasing its results, mainly due to the progress in emerging areas such as nanomedicine, regenerative medicine, and personalized medicine. For example, the development of novel drug delivery systems in the form of nanoparticles is improving the LADME (liberation, absorption, distribution, metabolism and excretion) properties of the derived formulations, with a consequent enhancement of the treatment efficacy, a reduction in the secondary effects, and a better compliance with the dosage guidelines. On the other hand, the utilization of biocompatible scaffolds is translating into the possibility of regenerating biological tissues. Additionally, personalized medicine is benefiting from the advantages offered by additive manufacturing. However, all these areas have in common the need to develop novel materials or composites that fulfill the requirements of each application. Therefore, this Special Issue aims to identify novel materials/composites that have been developed with specific characteristics to accomplish the biomedical application for which they were designed.

## About the Journal

### Message from the Editor-in-Chief

*Pharmaceutics* (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Patrick J. Sinko  
Department of Pharmaceutics, Ernest Mario School of Pharmacy,  
Rutgers University, Piscataway, NJ 08854, USA

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
