Cancer Gene Therapy With Non-Viral Nanocarriers

Message from the Guest Editors

Conventional therapies for cancer include surgery, radiotherapy and chemotherapy but often cause severe side effects to patients due to the lack of specificity. As a result, new therapeutic treatments are needed with improved efficacy and reduced toxicity. One of these is gene therapy. The successful implementation of gene therapy needs carriers that can protect the genetic material and efficiently deliver it specifically to cancer cells. Various delivery systems have been developed and studied, including viral vectors and non-viral systems, such as lipoplexes, polyplexes and inorganic nanoparticles. Non-viral vectors present various advantages such as their safety, low cost, ability to carry larger genetic materials and be designed with specific properties.

In this Special Issue, we invite researchers to submit original research articles focusing on novel gene delivery strategies for cancer treatment using non-viral nanocarriers. Review articles on the latest advancements made in above-mentioned areas are also welcome.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko
Department of Pharmaceutics, Ernest Mario School of Pharmacy,
Rutgers University, Piscataway, NJ 08854, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
