# Carbon Nanotube-Based Delivery Vectors for Cancer Therapy

## Message from the Guest Editor

The use of CNTs in cancer therapy is a promising new strategy that can revolutionize cancer treatment. For this reason, we are proposing this Special Issue on "Carbon Nanotube-Based Delivery Vectors for Cancer Therapy", which will highlight current advances in cancer drug delivery using carbon nanotubes and provide an overview of their potential in the delivery of cancer therapeutics ranging from small molecules to macromolecules but also their uniqueness in photothermal therapy. We invite articles on all aspects of CNT cancer therapy as briefly outlined in the Special Issue's scope as follows.

Carbon nanotubes for the delivery of small chemotherapeutics

Carbon nanotubes for the delivery of macromolecules for cancer therapy (excluding gene therapy)
Cancer gene therapy using carbon nanotubes
The use of carbon nanotubes in hyperthermia treatment/photothermal therapy
Cancer immunotherapy: What can carbon nanotubes offer?

Cancer targeting using CNTs CNT potential in radiotherapy
