

## Special Issue

# Dendrimers and Dendritic Materials against Infectious Diseases

### Message from the Guest Editors

In a context where antibiotic resistance and the spread of new viruses are seriously threatening human health, the use of dendrimers and dendritic materials emerges as a promising strategy. Their versatility, multivalency, and on-demand design enable an efficient response to combat multiple infectious diseases, including those produced by bacteria, viruses, amoebae, and parasites. The Special Issue "Dendrimers and Dendritic Materials against Infectious Diseases" in *Pharmaceutics* (IF 4.421) aims to assemble cutting-edge strategies which address these serious wide-spread diseases.

## About the Journal

### Message from the Editor-in-Chief

*Pharmaceutics* (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
