# **Dendrimers for Drug Delivery**

## Message from the Guest Editor

Within this Research Topic, we welcome contributions devoted to hot topics in rationally designed therapeutic formulations, including but not limited to the design of dendrimer-based supramolecular assemblies for drug delivery; physicochemical properties and fine structure of dendrimer constructions; optimizing nanoformulations to increase drug efficiency; stimulisensitive drug release; and tissue- and organ-specific delivery. We encourage the submission of ground-breaking concepts in the form of communications and high-level original research in the form of full papers. We also welcome comprehensive reviews and minireviews summarizing recent advances in the development of robust dendrimer-based approaches and technologies for drug delivery.
