The Role of Natural Products on Diabetes Mellitus Treatment

Message from the Guest Editors

Diabetes mellitus (DM) is a metabolic disease characterized by hyperglycemia due to secretion and/or the action of insulin or both. This disease of high incidence and prevalence affects the quality of life and productivity of the population that suffers from it. Although there are drugs that have been widely used in the treatment of this disease, at present the search for possible antidiabetic agents has continued, especially if they have more than one mechanism of action, taking into account the complexity of this pathology. Although it is difficult to find a substitute for insulin among plants, it is possible that molecules can be found that stimulate endogenous insulin biosynthesis and secretion or increase glucose absorption in blood by peripheral tissues, by acting as insulinomimetic or insulin secretagogue agents. This Special Issue is focused on the study of natural products (characterized extracts and isolated secondary metabolites) in the treatment of diabetes mellitus complications by in vivo and in vitro assays. Clinical trials are also welcome.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko
Department of Pharmaceutics, Ernest Mario School of Pharmacy,
Rutgers University, Piscataway, NJ 08854, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1
(Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
