

## Special Issue

# Dissolution and Disintegration of Oral Solid Dosage Forms

### Message from the Guest Editors

The disintegration and dissolution behaviour of solid oral dosage forms is an essential performance measure for all medicines. As available manufacturing methods for medicines diversify the level of control over intermediate (e.g. granules and spherical agglomerates) and final product microstructures is improving, and with it the ability to control disintegration and dissolution performance. There is increasing opportunity to design formulations and manufacturing methods to achieve desired release profiles, however the mechanisms behind dosage form disintegration and dissolution are complex and their link to raw material attributes, formulations, manufacturing and storage conditions are not fully understood. Contributions are invited which further the understanding, prediction and measurement of disintegration and dissolution of solid oral dosage forms. Of particular interest are studies which investigate the complex interactions of materials, formulations, manufacturing, storage and the disintegration and dissolution performance, and also those with proposed mechanistic models to explain and predict drug release phenomena.

## About the Journal

### Message from the Editor-in-Chief

*Pharmaceutics* (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Patrick J. Sinko

Department of Pharmaceutics, Ernest Mario School of Pharmacy,  
Rutgers University, Piscataway, NJ 08854, USA

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1  
(Pharmaceutical Science)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
