# Electrospun and Electrosprayed Formulations for Drug Delivery

# Message from the Guest Editors

Electrospinning and spraying have been widely explored to prepare drug delivery systems. Investigations of a wide range of polymers and their blends have been undertaken in order to produce advanced materials. The potential applications of electrospun nanofibres lie in areas as diverse as anti-cancer therapeutics, gene therapy, wound healing, as post-surgical abdominal anti-adhesion products, and for tissue engineering. Electrospun nanofibres can mimic the topographical features of extracellular matrices, and thus are potentially extremely useful for the production of bioactive scaffolds, combining the controlled release of a wide variety of therapeutically active agents with a nanofibrous scaffold which will support cell proliferation or prevent cell migration. Despite their great promise, there is more research still to be done before electrospun formulations can fulfil their potential in the clinic. This special issue of Pharmaceutics has a clear focus on research in these important areas, and we would welcome submissions from colleagues working in them.

# **About the Journal**

# Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

#### Editor-in-Chief

Prof. Dr. Patrick J. Sinko

Ernest Mario School of Pharmacy, Rutgers, The State University of New Jersey, William Levine Hall, Room 225C, 160 Frelinghuysen Road, Piscataway, NJ 08854-8020, USA

### **Author Benefits**

# **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

# **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
