Therapeutic Formulations of Repurposed Drugs against COVID-19

Message from the Guest Editors

In this Special Issue, we invite academic and industrial research partners to contribute with innovative works on new therapeutic formulations of repurposed drugs against SARS-CoV-2, which may include nanocarriers, nanoreactors, microemulsions, microspheres, dry powders, co-crystals, organic salts, ionic liquids, eutectic systems, amorphous solid dispersions, among many others. In vitro, in vivo and in silico studies regarding alternative drug administration modes (pulmonary, transdermal, percutaneous) of such drugs are also welcomed.

- amorphous solid dispersions
- COVID-19
- drug delivery
- drug formulations
- drug repurposing
- eutectic systems
- ionic liquids
- nano and microparticles
- nanomaterials
- SARS-CoV-2

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.
