New Formulation for Acute and Chronic Inflammatory Diseases

Message from the Guest Editors

Inflammation is the process by which the immune system recognizes and removes harmful stimuli and initiates the healing process. Inflammation can be divided into two types, acute and chronic, the latter being able to contribute to a wide range of diseases such as intestinal diseases, diabetes, asthma, osteoarthritis, cardiovascular diseases, allergies, Alzheimer's, autoimmune disorders, and lung diseases, among others. Different alternatives of pharmaceutical formulations have been used for the treatment where inflammation has its main role, as well as drug delivery systems, including liposomes, nanoparticles (lipid and polymeric), nanocrystals, dendrimers, niosomes, and micelles. In addition, dosage forms such as semi-solid, solid, liquid, oral and topical formulations have historically been used with excellent results. This Special Issue serves to highlight and capture the continuous progress and the current situation of different new pharmaceutical formulations for the treatment of inflammatory diseases. We invite articles on all aspects of acute and chronic inflammation using different pharmaceutical formulations, including diverse routes of administration.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko
Department of Pharmaceutics, Ernest Mario School of Pharmacy,
Rutgers University, Piscataway, NJ 08854, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1
(Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
