Special Issue

The Role of Fungi in Pharmaceutical Biotechnology

Message from the Guest Editors

Biopharmaceuticals are an important and continuously growing class of pharmaceuticals, having found frequent use and an integral role in the treatment of many different diseases. In general, the development and production of biopharmaceuticals involves prokarvote systems; however, most often, due to the need of complex (post-translational) modifications, eukaryotic systems such a yeast or mammalian cells are used. In addition to filamentous fungi-derived pharmaceuticals, molds and fungi still play an important role in antibiotic production. More recently, fungi have been showing the highest titers for protein and peptide production, including biopharmaceuticals. The aim of this Special Issue of *Pharmaceutics* is to collect research and review papers regarding products manufactured in, extracted from, or semisynthesized with the aid of fungi. We welcome articles dealing with all aspects of fungal-based biotechnology and invite researchers and drug developers to publish their original research or review articles with expert opinions and perspectives in the area of therapeutics.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko

Ernest Mario School of Pharmacy, Rutgers, The State University of New Jersey, William Levine Hall, Room 225C, 160 Frelinghuysen Road, Piscataway, NJ 08854-8020, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
