Gels and in Situ Gelling Formulations for Drug Delivery

Message from the Guest Editors

Over the last few years, the development of gels and in situ gelling formulations has received considerable attention in the pharmaceutical and biomedical fields.

The present Special Issue serves as an overview of current research on this interesting topic, highlighting the current progress in the field of gel pharmaceutical development and elucidating the mechanisms of in situ gelation of polymeric materials. The possible topics include, but are not limited to the following:

- hydrogels
- organogels
- in situ gelling drug delivery systems
- in situ gelation mechanisms
- thermoresponsive formulations
- ion-sensitive formulations
- pH-sensitive formulations
- photo-induced sol-gel transition
- bioadhesion

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.7 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2025).
