

## Special Issue

# Topical Drug Delivery: Innovative Controlled Release Systems

### Message from the Guest Editors

The topical route is one of the most convenient strategies for drug administration and offers numerous advantages compared to traditional ones such as local drug release, easy application, and patient compliance, avoiding first-pass biotransformation. However, the stratum corneum complex structural organization is one of the main limitations to drug absorption, which can be overcome by the development of innovative technologies. This issue is devoted to the design, characterization, and evaluation of skin-delivery systems and new formulations as well as insights on new methods and perspectives on skin-delivery systems.

## About the Journal

### Message from the Editor-in-Chief

*Pharmaceutics* (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.7 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2025).
