# Lipid-Based Drug Delivery Systems: The Key Ingredient for Future Medicine

# Message from the Guest Editors

Lipid-based matrices are state-of-the-art tools employed to envelop and protect a vast range of therapeutics from degradation and to deliver them safely to the site of action. Due to their unique ability to compartmentalise hydrophilic and hydrophobic components, they have been utilized to achieve targeted and/or controlled drug release. Whilst a plethora of lipidic drug carriers have been reported in the last few decades, with many lipid-based products already on the market or undergoing clinical trials, there is still a pressing need for new formulations tailored to target different sites of action and to incorporated novel drugs. Research into the innovative use of lipidic platforms in pharmaceutics is vital for their application as a mean to modify or control the release of drugs in vitro and in vivo. This Special Issue aims to highlight research on the encapsulation of pharmaceuticals and bio-pharmaceuticals in lipidic systems, their behaviour in biological environments, controlled release kinetics, and organ-specific bioavailability (e.g., through a targeting strategy). Reviews or original articles on these topics are welcome.

# **About the Journal**

# Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

#### Editor-in-Chief

Prof. Dr. Patrick J. Sinko

Ernest Mario School of Pharmacy, Rutgers, The State University of New Jersey, William Levine Hall, Room 225C, 160 Frelinghuysen Road, Piscataway, NJ 08854-8020, USA

#### **Author Benefits**

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
