Special Issue

Enhancement for Strategies in Liposomal and Niosomal Preparations: Formulative and Technological Innovations

Message from the Guest Editors

Currently, industrial pharmaceutical/nutraceutical manufacturing has to comply with two major needs: the mandatory regulations for formulation safety and the sustainability of production. Within this framework, the role of scientific research into more powerful drug delivery systems appears to be highly relevant because it can give responses to the industry about both the formulative and preparative issues. Lipid-based drug delivery systems are recognized as safe and effective carriers. The different classes of liposomal and niosomal vesicles are the main expression of delivery systems for which formulation and preparation can be easily tailored to meet different disease conditions, routes of administration, structures (coated, functionalized, stealth) and sizes, stabilities, and costs. This Special Issue aims to collect cutting-edge research results on liposomes and niosomes that have been achieved through both formulative and preparative approaches, with the aim of moving towards advanced technologies for pharmaceutical manufacturing. A key point of this Special Issue is to connect multidisciplinary competences in drug membrane-mimetic delivery systems.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko

Ernest Mario School of Pharmacy, Rutgers, The State University of New Jersey, William Levine Hall, Room 225C, 160 Frelinghuysen Road, Piscataway, NJ 08854-8020, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
