

Special Issue

A Commemorative Issue in Honor of Professor Gregory Gregoriadis: Liposomes for the Delivery of Drugs and Vaccines

Message from the Guest Editor

The design and development of liposomal drugs may offer solutions to such delivery problems, especially if the liposomal carriers can reach, and deliver the associated drug to their specific biological targets. In addition to Drug Delivery solutions, liposomes can offer solutions to vaccination limitations. Vaccination is often hampered by the presence of infectious agents, weak immune responses and prohibiting costs. Such problems may be circumvented by immunisation with nucleic acids, especially when associated with cationic lipids in the form of liposomes and other lipid-based nanoparticles. The contributors of the present volume deal with the background and progress made so far with liposomes for drug delivery and targeting, as well as vaccines. Theoretical and practical advantages as well as potential risks are discussed.

liposomes for drug delivery
development, applications, and challenges of ligand-targeted liposomal drugs
liposomes and biological barriers
liposomes as immunological adjuvants
cationic liposomes and lipid nanoparticles as vaccine carriers
immunization with nucleic acids in liposomes
entrapment of nucleic acid vaccines in cationic liposomes

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko
Department of Pharmaceutics, Ernest Mario School of Pharmacy,
Rutgers University, Piscataway, NJ 08854, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1
(Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
