Special Issue

Novel Devices for the Oral Delivery of Macromolecules

Message from the Guest Editors

It is challenging to deliver macromolecules (e.g., proteins, peptides, antibodies, and oligonucleotides) orally due to the delivery barriers and microenvironmental challenges encountered along the gastrointestinal tract. In the last few years, novel medical devices have been developed which are capable of overcoming these barriers and delivering a wide range of molecules in different organs, all the way from the mouth to the colon. Microneedle-based pills, nanostraws, microjets, hydrogels and intestinal patches are some of the device-based solutions that researchers have designed to enable the oral dosing of macromolecules. These alternative delivery methods have the potential to revolutionize many treatments by increasing patient adherence and efficacy while reducing pain and other side effects. This Special Issue aims to capture the most recent advances to overcome the oral drug delivery barriers of the gastrointestinal tract. We invite reviews and research articles from clinical, academic, and industry settings on "Novel Devices for the Oral Delivery of Macromolecules."

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko

Ernest Mario School of Pharmacy, Rutgers, The State University of New Jersey, William Levine Hall, Room 225C, 160 Frelinghuysen Road, Piscataway, NJ 08854-8020, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
