New Perspectives for the Administration of Cannabis for Medical Use: From Traditional to Advanced Formulations. What Next?

Message from the Guest Editors

In recent years, following the legalization of cannabinoids for medical use in various countries, there has been an exponential increase in its use and a growing interest in this field. Therefore, scientific research on medical cannabis has rapidly advanced, and the ever-increasing number of experimental studies suggests that phytocannabinoids could be useful for various pathological conditions. The phytocomplex of cannabis plants is composed of over 500 different constituents, of which about a hundred belong to the class of cannabinoids, where minimal differences in their structure can induce very different effects. The molecules of greatest interest for their pharmacological activity are THC and CBD, but recent studies have also focused on the effects of other molecules, such as cannabigerols, cannabichromenes, and also terpenes. This Special Issue of *Pharmaceutics* focuses on articles and reviews relating to extractive or advanced formulations based on cannabis for medical use, currently under study for therapeutic purposes. Studies relating to the development of galenic formulations will also be considered.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko

Ernest Mario School of Pharmacy, Rutgers, The State University of New Jersey, William Levine Hall, Room 225C, 160 Frelinghuysen Road, Piscataway, NJ 08854-8020, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.7 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2025).
