Mesenchymal Stem Cells- Based Gene Therapy Approach Mediated by Non-viral Vectors

Message from the Guest Editor

The ability to culture expand Mesenchymal Stem Cells (MSCs) easily, differentiate them into different cell types in vitro, in addition to their appealing immunologic characteristics, clearly render MSCs a promising source of stem cells, for gene therapy. Genetic material transfection could be done for cells in vitro, in vivo and ex vivo. The development of a suitable delivery system to carry the correct gene to the affected target cells is an essential aspect of gene therapy. Safe and effective gene delivery for long-term remains a big challenge for gene therapy. Recent advances in nanotechnology, material sciences, and nucleic acid chemistry have provided promising non-viral delivery systems, which should increase the potential of MSCs based gene therapy. Non-viral delivery systems show quite a big number of challenges that needs to be circumvented in order to increase their gene transfer effectiveness, especially in MSCs.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko

Ernest Mario School of Pharmacy, Rutgers, The State University of New Jersey, William Levine Hall, Room 225C, 160 Frelinghuysen Road, Piscataway, NJ 08854-8020, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.7 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2025).
