

Special Issue

Design of Mesoporous Materials for Biomedical Application

Message from the Guest Editors

In the last decade, considerable attention has been addressed toward the use of a wide range of mesoporous materials for the development of advanced devices for biomedical applications. Their excellent intrinsic properties make them excellent candidates for storing several therapeutic molecules and releasing them to the target on demand after proper stimuli. Based on these considerations, these multifunctional nanocarriers are ideal candidates for the design of advanced scaffolds and smart drug delivery systems to treat cancer and compromised tissue healing or for theragnostic applications.

The final aim of this Special Issue is to provide an overview of the most recent advances and new approaches for the design, functionalization, and strategies to boost the clinical translation of mesoporous materials for advanced tissue engineering, cancer therapy, and theragnostics. Among them, this issue is devoted to focusing attention on their uses as multifunctional delivery systems to target and deliver therapeutic agents, including small molecular drugs, peptides, proteins, nucleic acids, as well as imaging agents and sensing molecules, directly to the pathological site.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko
Department of Pharmaceutics, Ernest Mario School of Pharmacy,
Rutgers University, Piscataway, NJ 08854, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1
(Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
