Nanotechnology-Based Drug Delivery Systems

Message from the Guest Editor

To date, there has been growing interest in the use of nanotechnologies for the creation and investigation of drug delivery systems (DDSs) in the development of novel forms of efficient pharmaceutical dosages. Such nano-sized drug carriers may be used not only to maintain a required blood level of a pharmaceutical agent for an extended period of time for a better drug bioavailability, but also to decrease a drug's toxicity or provide the dissolubility of poorly soluble active substances for injection-administrated medicines in the form of highly dispersed aqueous systems. Numerous nano-scaled DDSs such as liposomes, metal nanoparticles, carbon nanoparticles and nanotubes, nano-crystals, polymeric nanospheres, nanocapsules and micelles, dendrimers, ghost bacteria and viruses and even quantum dots are being thoroughly investigated for the delivery of various drugs and diagnostic agents, both of a low- and high-molecular-weight origin. The aim of this Special Issue of the *Pharmaceutics* journal is to collect research and review papers regarding nanotechnology-based DDS applications in the pharmaceutical field.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko
Ernest Mario School of Pharmacy, Rutgers, The State University of New Jersey, William Levine Hall, Room 225C, 160 Frelinghuysen Road, Piscataway, NJ 08854-8020, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
