Novel Nano-Encapsulation in Targeted Drug Delivery

Message from the Guest Editor

For this issue of *Pharmaceutics*, we are interested in high-quality publications (e.g., articles, reviews, commentary, letter, case studies) covering all aspects of nanotechnology-based drug, cell or plasmid applications, for treating diseases. The issue has a medically focused scope with a focus on bio-nanotechnological advancement. We have a particular interest in the role of bile acids that have recently demonstrated great potential in therapeutic delivery, as excipients, permeation-enhancers as well as endocrinological and pharmacologically active compounds.
