Special Issue

Nanocarriers for Drug Delivery Systems

Message from the Guest Editor

Drug delivery carriers have been successfully used in the previous years for the controlled release of therapeutic compounds for the treatment and cure as well as the diagnosis of many diseases. Drug carrier formulations are designed to connect a number of different possible actions depending on the needs of the future purposes for which they are processed. The use of nanomaterials has a lot of preferences and is becoming more pronounced in recent years. In fact, in recent years, nanotechnology, based on the manipulation of the matter in the nanoscale range, has produced a scientific revolution in different fields of application. Specially, this emerging technology is gaining prominence in the design of target drug delivery platforms. Research in this field has been focused on the use of nanostructures as drug carriers with unique size-dependent properties of biological and biomedical relevance that are able to improve the therapeutic efficacy of common drugs already used in clinical practice.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko

Ernest Mario School of Pharmacy, Rutgers, The State University of New Jersey, William Levine Hall, Room 225C, 160 Frelinghuysen Road, Piscataway, NJ 08854-8020, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
