This Special Issue will highlight current progress in the development of nanocarriers for drug delivery or gene therapy in cancer. In this regard, we would like to invite members of academic and scientific communities to contribute original papers or reviews on the development, characterization, and possible applications of the nanocarriers for drug delivery or non-viral gene therapy delivery systems. We encourage the submission of manuscripts approaching both in vitro and in vivo studies with potential approaches of tumor-on-chip cutting-edge technology.
