## Nanoparticle Delivery to Tumors: Challenges and Advances

## Message from the Guest Editors

Nanoparticles have emerged as versatile drug delivery vehicles for applications in oncology and other pathologies. However, although several types of nanoparticles have been developed, their effective delivery to tumors is still a major challenge, especially nanoparticles ≥100 nm in diameter. Enhanced vascular permeability in tumors has been shown to play an essential role in the delivery of nanoparticles of this diameter range to tumors, through the enhanced permeability and retention (EPR) effect. Furthermore, the poor clinical performance of some nanoparticles has been partially attributed to variabilities in the vascular permeability within tumors and within different patient populations. Consequently, tumor-priming strategies designed specifically to enhance tumor vascular permeability and subsequently increase the delivery of nanoparticles to tumors are currently being explored. In this Special Issue, we shall cover some of the challenges associated with delivering nanoparticles to tumors, and some advances that have been made to increase the delivery efficiency of nanoparticles to tumors.

## **About the Journal**

## Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

#### Editor-in-Chief

Prof. Dr. Patrick J. Sinko

Ernest Mario School of Pharmacy, Rutgers, The State University of New Jersey, William Levine Hall, Room 225C, 160 Frelinghuysen Road, Piscataway, NJ 08854-8020, USA

### **Author Benefits**

## **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

## **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
