Gold Nanoparticles for Biomedical Application

Message from the Guest Editor

Gold nanoparticles present a unique size and shape-dependent optical, catalytic, magnetic, and biological properties, which can be widely exploited in nanomedicine, from therapeutics to imaging, biosensing, and diagnostics. This Special Issue highlights the advances and challenges of gold nanoparticle-based systems for biomedical applications, including findings on new properties, particular advances concerning fundamental studies (bionano-interactions), new synthetic methods improving their use in biology (i.e., bioconjugation, surfactant-free, controlled scale-up, etc.), in vitro/in vivo translational studies, new mechanisms for colorimetric sensing, and portable diagnostic devices. Original works as well as review articles focusing on these topics are invited.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1
(Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
