Advances in Parenteral Formulations

Message from the Guest Editors

In recent years, there has been great progress in the field of parenteral drugs. This is due to the development of pharmaceutical technology and drug analysis as a response to the emergence of clinical challenges. The crucial issue in parenteral formulation is chemical, physical, and microbiological stability. One of the biggest problems of the technological process of such drugs is the poor solubility and permeability of most active pharmaceutical ingredients. To overcome this disadvantage, nanotechnology is used, including lipid-based, polymeric, and hybrid nanoparticles. Prolonged drug release formulations are developed, such as in situ implants and drug carriers enabling the drug to reach a critical organ or neoplastic tumor. Other important issues related to parenteral drugs are their safety, PK/PD interactions, and drug compatibility when administered simultaneously through the same vascular access. This Special Issue in *Pharmaceutics* is dedicated to the advantages of parenteral formulations and aims to draw together experts in the fields of pharmaceutical sciences, technology, analytical chemistry, and clinical medicine.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko
Department of Pharmaceutics, Ernest Mario School of Pharmacy,
Rutgers University, Piscataway, NJ 08854, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1
(Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
