Peptide-Based Drug Delivery Systems

Message from the Guest Editor

Peptides are natural components of our biological system. They are building blocks of proteins and are involved in several biological processes to regulate the functioning of our complex biological system. Peptides are very specific to their targets. Thus, they are used in targeting the drugs to specific cells and tissues. This strategy could reduce the various side effects of the drug. Various drugs and other pharmaceutical candidates fail to reach their target due to limitations to their cellular permeability and/or oral bioavailability. Peptides are found as an alternative candidate compared to other drug delivery systems due to their safety, easy functionalization with various pharmaceutical candidates, robustness of synthetic methodology, availability to use natural or unnatural amino acids, targeting with biomarker ligands, and use of peptidomimetics to improve pharmacokinetics property. Peptides also have the potential to be used to deliver biomaterials. In connection with the above, this Special Issue aims to cover new approaches, methodologies, and perspectives towards recent development in the use of peptide-based drug delivery.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko
Department of Pharmaceutics, Ernest Mario School of Pharmacy,
Rutgers University, Piscataway, NJ 08854, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1
(Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
