

Special Issue

New Pharmaceutical Applications through 3D Printing Processes

Message from the Guest Editors

Additive manufacturing and 3D printing (3DP) are technologies with a growing interest in the pharmaceutical field. During the last decade, new techniques, innovative applications, and different materials have been developed and tested. Not only the direct production of pharmaceutical forms but also the development of manufacturing and analytical systems has been explored. The use of 3D-printing technologies opens new opportunities for the manufacturing of personalized dosage forms and medical devices tunable for the patient's needs, but also for the development and personalization of manufacturing and analytical systems based on researchers' needs. Nevertheless, since pharmaceutical 3DP is still a growing field, different requests still have to be explored, such as the improvement of pharmaceutical dedicated 3D printers and production lines, as well as the advancement of dedicated printable excipients. This Special Issue will collect contributions about innovative materials, innovative techniques, and innovative approaches using 3D printing with a pharmaceutical endpoint.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko

Ernest Mario School of Pharmacy, Rutgers, The State University of New Jersey, William Levine Hall, Room 225C, 160 Frelinghuysen Road, Piscataway, NJ 08854-8020, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.7 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2025).
