# Recent Advances in the Use of Phospholipids in Drug Delivery

### Message from the Guest Editor

This Special Issue aims to summarize recent trends in the use of phospholipids in the field of drug delivery. In addition to recent research on liposomal and related nanoparticulate formulations as intravenous drug carriers, the major aim of this Issue is to explore the utility of phospholipids in alternative formulations and administration routes, addressing major challenges in current drug development such as poor bioavailability (e.g., hydrophobic small molecules) as well as the formulation of large molecules (e.g., proteins and nucleic acids). In addition, the use of phospholipids in models for in vitro testing (e.g., permeability) and relevant characterization issues (e.g., drug release) will be addressed.

## About the Journal

### Message from the Editor-in-Chief

*Pharmaceutics* (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1  
(Pharmaceutical Science)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
