Special Issue

Polymer-Based Micro- and Nanocarriers for Drug Delivery and Targeting

Message from the Guest Editors

Over the last fifty years, the development of biodegradable polymeric materials for pharmaceutical applications has advanced significantly. In the same way, the development of drug delivery systems based on natural and synthetic polymers exhibits exponential growth in pharmaceutical and biomedical fields. Thanks to the tunable properties of polymeric biomaterials, carriers with different structure, size, shape, and surface charge can be obtained. Therefore, different kinds of micro- and nanosystems can be produced from polymeric materials using a wide variety of fabrication techniques. The pharmaceutical application of polymeric carriers is also crucial in diagnostics as well as in prophylaxis (vaccines) and therapy for various pathological conditions. Based on the current and continuing relevance of this category of drug delivery systems, and looking ahead, this Special Issue will give readers a concise overview of the recent innovative design and application of controlled-release polymeric drug delivery systems. Topics including detailed physico-chemical and technological characterization of innovative polymeric systems and in vitro/in vivo correlations are warmly welcomed.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko

Ernest Mario School of Pharmacy, Rutgers, The State University of New Jersey, William Levine Hall, Room 225C, 160 Frelinghuysen Road, Piscataway, NJ 08854-8020, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
