

## Special Issue

# Advanced Polymeric Delivery Systems for Cancer Therapy

### Message from the Guest Editor

Polymers have attracted attention as suitable materials for advanced medical applications for at least the last three decades. Among the studied materials in anti-cancer therapy, polymers applicable for controlled drug delivery belong to highly-promising systems, which allow the delivery and/or targeting of drugs, biomolecules, imaging and contrast agents. Despite the fact that polymer-based delivery systems are rarely used in clinical practice, there is still a major effort to develop such novel polymers with advanced properties as they enable to obtain smart vesicular carriers suitable for targeted delivery of various biologically-active molecules. This Special Issue of *Pharmaceutics* focuses on new strategies and approaches to polymer-based delivery systems intended for anti-cancer therapies, which could help to solve issues dealing with passive and active targeting, stimuli-sensitive behavior and overcoming biological barriers. We welcome articles concerning all aspects of polymer-based drug delivery intended for advanced therapy of cancer. Especially, new materials, strategies and synthetic approaches are welcome for this Special Issue.

## About the Journal

### Message from the Editor-in-Chief

*Pharmaceutics* (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1  
(Pharmaceutical Science)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
